DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: the 371 parentage of the application should appear immediately after the title. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 12, 13 and 15-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2002-068719, cited as an abstract by applicant in the IDS and used for purposes of this Office Action in the form of a partial machine translation of the full patent.

The reference teaches the production of hydroxylamine by reacting hydroxylammonium sulfate with calcium oxide or calcium hydroxide (paragraph [0001]; Example 1, paragraph 0019)). The reaction is performed at 40-80°C (paragraph [0011]) and at a pH below 9-0-9.2 (paragraph [0013]). Solvents are water and alcohol (paragraphs [0014] and [0019]). A stabilizer is used (paragraph [0014]). A solid

(calcium sulfate) is removed after the initial reaction (paragraph [0019]).

Distillation/concentration is used as a means of purification (paragraph [0015]).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 11, 14 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2002-068719 above.

Applicant claims a recycling step.

JP 2002-068719 has been outlined above.

Applicant distinguishes over the prior art in that a step of recycling solvent is claimed. However, it would have been obvious to one of ordinary skill in the art at the time of invention to recycle solvent where possible, motivated by economic considerations.

Allowable Subject Matter

Claims 20-39 are allowed.

Claim 19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
